Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 6/25/2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Amendment

1. The following is a response to the amendments filed on 6/25/04.

Claims 1-22, 24, 25, 27, 28, and 30-33 are pending in the instant application.

Claim Rejections - 35 USC § 112, First paragraph

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-22, 24, 25, 27, 28, and 30-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. According to claims 1, 5, 13, and 28, the resend request includes information identifying a storage area where the requested data is stored. The specification does not describe how this task is performed. According to the specification, the address of the bad data is determined, and this address is transmitted to the source of the bad data. The specification fails, however, to explain how this determination is accomplished. Claims 2-4, 6-12, 14-22, 24, 25, 27, and 30-33 depend on claims 1, 5, 13, and 28 are therefore similarly rejected.

Response to Arguments

4. Applicant argues that one skilled in the art would know how to transfer the TR and K values from the AL3 sending entity to the AL3 receiving entity without having to perform undue experimentation. Examiner respectfully disagrees with applicant's characterization of the issue raised by examiner.

The question is not how TR and K reach the receiving entity, but whether the specification describes or even suggests that the transmitting entity is to send TR and K values to the receiving entity. Applicant's arguments are therefore not found to be persuasive. The specification does not describe or suggest that TR and K values from the sending entity are communicated to the receiving entity. Furthermore, applicant did not provide any evidence that the feature of communicating memory address location to the receiver is known in the art or would be within the appreciation of one skilled in the art in light of the specification's disclosure. Therefore, the Examiner concludes that the rejection of claims 1-22, 24, 25, 27, 28, and 30-33 stands rejected.

Conclusion

5. This is an RCE of applicant's earlier Application No. 09223729. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a

first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hong Cho whose telephone number is 571-272-3087. The examiner can normally be reached on Mon-Fri during 7 am to 4 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 571-273-3088.
